

## PRESS RELEASE

### 3GNS Creates R&D Solutions Subsidiary After Acquiring Swedish Engineering Staff From Andrew

Telecom network service provider 3GNS is creating a new subsidiary—3GNS R&D Solutions AB—focused on providing unique research and development solutions to address the challenges of today’s telecommunications market. Creation of the new subsidiary follows 3GNS’ acquisition of the R&D staff from the Kista, Sweden facility of Andrew, the CommScope, Inc. division that is a global leader in wireless communications systems and products.

The acquisition of the R&D resources is in line with 3GNS’ strategy to offer research and development services to the telecom industry. Today’s telecom manufacturers are challenged to find more cost-efficient and dynamic ways to develop new products. 3GNS has extensive experience in providing top technical expertise for cost-effective operations of complex telecom networks. Through this new subsidiary, 3GNS R&D Solutions is offering comprehensive product development services for the wireless communication industry.

3GNS R&D Solutions offers strong technical design team with vast experience of mobile communication product development from concept to production. With a fully equipped lab and development tool set, and expertise of product design, including software design, FPGA/ASIC, digital signal processing and radio design.

“In line with our strategy to diversify and based on my R&D telecom experience, I strongly believe 3GNS R&D Solutions will be the right response to the challenges of today’s telecom manufacturers needs to ensure cost efficient and high quality solutions,” said 3GNS Group CEO Asad Babaei.

#### *Facts about 3GNS.*

*3GNS a provider of network services and solutions, consultants and training for world class operations of mobile networks and communication systems. With expertise within 3G, GSM, and IP-based networks we offer our customers cost effective operations, increasing the quality of service of their networks and enhancing the end customer satisfaction.*
